PROFILE

I've been working as a full-stack Java developer for over four years. I've successfully participated in dozens of projects providing end-to-end solutions for both mobile and web applications, focusing on performance, security, and scalability. I currently enjoy working in areas like JAVA Spring Boot, Next.JS, and React-Native. I strive to develop my projects with clean code and a user-friendly approach.

EMPLOYMENT HISTORY

Full Stack Developer - Limon Kabuğu Jun, 2025

We worked on our own projects at a software company in Konya. Two of the most important of these projects were the "Mentor Tracking Mobile Application" (mentortakip.com) and the "Bank Current Account Tracking Web Project" (bankacaritakip.com). Both are now live and available for use. The Mentor Tracking app, available on iOS and Android, connects teachers, students, and parents, and tracks student progress in every aspect. The Bank Current Account Tracking app is web software that automatically issues invoices based on account activity received from banks via API.

Full Stack Java Developer - Adorb Yazılım Feb 2025 - Jun 2025

I single-handedly undertook a CRM software project for a car recovery company, managing workflow processes, progress payments, and invoicing. I developed the project using Java Spring Boot and Next.Js technologies, and deployed it myself.

Frontend Developer (React) - dekorobi.com Jul 2024 - Jan 2025

I worked on the frontend of a marketplace project in Türkiye that connects sellers and buyers, similar to ETSY. I completed the project using React technology and Tailwind.

Full Stack Developer - Turk Natural Imp Exp Jan 2020 - Jul 2024

I single-handedly managed all e-commerce and software systems for a company operating domestically and internationally, both importing and exporting. I developed website design, product management, shipping, and invoicing processes.

Web Developer -Freelance Sep 2009 - Jan 2020

I started my own business in Ankara and worked on freelance projects. I designed and managed over 100 websites. But with the advancement of technology, I gravitated toward Java and decided to tackle larger projects from scratch.

SKILLS

JAVA - Hibernate - Spring Boot - SQL (mongoDB, PostgreSQL) - Next.JS - React JS - React-Native
HTML/CSS/Bootstrap/Tailwind/SASS - Wordpress

EDUCATION

Selçuk University- Faculty of Technology

Sep 2023

Computer Engineer

Gazi University - Faculty of Education

Sep 2005 - Sep 2009

PROJECTS DETAILS

Bank Current Tracking System

May 2025

Technology Used: Java Spring Boot + Next.JS

Project Description: This project was developed primarily for money changers. Its purpose is to streamline the invoicing process in businesses with rapid cash flow and where invoices are required after each transfer. Invoices can also be generated automatically. It can receive money transfers from multiple accounts at multiple banks via API, and then generate e-invoices using various integrators via API.

Project Address: demo.bankacaritakip.com

Student Tracking Application – Mobile (IOS + Android)

Sep 2024 - Mar 2025

Technology Used: React Native

Project Description: An app that allows teachers, mentors, or advisors to track their students and mentees. It also integrates parents into the system. This app allows users to add tasks, track book readings, analyze exams, and track topics. It's currently available on Google Play, and the iOS version is currently under review.

Project Address: mentortakip.com

Rescue Automation – CRM

Mart 2025 - May 2025

Technology Used: Java Spring Boot + Next.JS

Project Description: A project that automates the process from job order creation to job completion for a company that provides auto tow truck and forklift rental services. This CRM project allows drivers, vehicles, and customers to be identified, tracks all vehicle information, and sends SMS or WhatsApp notifications to all relevant parties.

School Management System – LMS

Jul 2025 - Oct 2025

Technology Used: JAVA Spring Boot + Next.JS

Project Description: A web-based Student Management System designed using Java Spring Boot as the backend and Next.js as the frontend. The application tracks students, courses, teachers, semesters, and grades. The project also functions as a Learning Management System (LMS). It has been marketed to an international angel investor.

Project Address: easygoingeducations.com

Real Estate Management

Apr 2024 - Jun 2025

Technology Used: JAVA Spring Boot + Next.JS

Project Description: A property management system that includes features such as user management, property listings, category management, image uploading, and appointment scheduling.

Project Address: http://64.227.123.49/

Library Management Application

May 2024 - Jul 2025

Technology Used: JAVA Spring Boot + Next.JS

Project Description: Allows adding books by category and author, and also includes a search function.

Project Address: librarydreams.com
